Languages: English (Basic Toiece {290}), Japanese (Basic).

EDUCATION

SMK TI BAZMA
SIJA

Bogor, Jawa Barat
July 2023 - Present

IT-based boarding school with a 4-year program, focusing on programming, web development, IoT, networking, and computer systems, to build personal skills and abilities.

EXPERIENCES

Member of The Security Division - STUDENT COUNCIL OF SMK TI BAZMA 2024

Coordinated a dedicated team to enforce school-wide discipline and hygiene standards, ensuring a secure and organized environment for all students through consistent monitoring and leadership.

Finance & Operations – IWI (Entrepreneurship & Creativity School) 2024

Managed cash flow records, calculated raw material costs, and prepared revenue estimates for sales activities at more than 3 major school events. Contributed to simple financial management for the sale of more than 100 homemade food products, including basic profit and loss calculations, capital management, and sales result evaluation. Gained hands-on experience in basic financial management, cost control, profit analysis, teamwork, and entrepreneurship.

PROJECT

Network Framework - School Project (SMK TI BAZMA) 2025

As a Framework Builder, I have designed and implemented a structured, efficient, and simple network framework at SMK TI Bazma by utilizing the Cisco Packet Tracer application as a simulation and testing medium.

Sensor Data Application (Laravel + Next.js) School Project IOT 2026

- Building a web application using Laravel (backend) and Next.js (frontend)
- Implementing an authentication system (login & registration)
- Developing CRUD features for data management
- Integrating a MySQL database
- Designing a responsive and user-friendly interface.

Revan Portfolio Personal Project 2026

- Developing a portfolio website using Next.js
- Showcase your projects and skills with a modern, responsive design
